

Product selector GIVUL Prevulcanised Latex

1/2

GIVUL Latices are pre-vulcanised natural rubber latices preserved with high- or low ammonia content.

GIVUL Latices are suitable for dipping, coating, adhesives and many other applications. They provide high clarity, different moduli and excellent ageing properties to all kind of products.

There are **GIVUL Latices** especially designed for food and medical applications as to Nitrosamine and Chemical requests of FDA and BGA, others for electricians gloves etc.

<u>GIVUL</u>	<u>TYPICAL PROPERTIES</u>		<u>APPLICATIONS</u>
Types:	Alkalinity (NH ₃ , % min)	Modulus (unaged, 700 % min)	
MR	0,6	medium	all, multi purpose
MBR	0,6	medium	high viscosity, moulding *)
MRS	0,6	medium	dipping, medical goods, excellent sterilisation properties.
HR	0,6	high	all, multi purpose
LR	0,6	low	all, multi purpose
LA	0,3	medium	all, multi purpose
LHM	0,3	high	all, multi purpose
LAN EU	0,3	medium	dipping, food + medical, low Nitrosamine acc. FDA /BGA
MLA 21	0,3	medium	dipping, medical & elektricians gloves a.o. vulcanisation system acc. FDA/BGA
SMLA 21	0,3	medium	dipping, medical & elektricians gloves a.o. vulcanisation system acc. FDA/BGA
HLA 21	0,33	high	dipping, medical & elektricians gloves a.o. vulcanisation system acc. FDA/BGA
LP 2	0,6	medium	Low extractable protein type, good ageing properties, for dipping

General Typical Properties of GIVUL:**approx:**

Total Solid Content (TSC)	%	60.5 ± 0.5	
MST @ 55% TSC	sec.	800 min.	
B/F Viscosity, 2/60 at 26±2 °C	cps	120 max.	*) except MB
pH		10.50 ± 0.5	

Packing GIVUL:

Drums 205 kg net, Open Top - drums 200 kg net *), PE–drums 205 kg net, tank container,

Other products available from Getahindus:

Besides GIVUL PV – Latex GETAHINDUS is supplying :

G-TEX DPL	Depolymerised natural rubber latex concentrate Application: adhesives, viscosity modifiers, plasticisers, textile- and paper impregnation, paint coatings
GAPOLY	Natural Latex modified with Methacrylates to enhance rubber properties and adhesion properties to non rubbers. Application: Adhesives and Rubber Products
LOPROTEX	A variety of low protein natural latex especially designed to avoid allergic protein reactions of users of medical gloves etc., especially designed for dipping.
SKIM BLOCK RUBBER	Different types with a variety of technical properties based on PV Rubber and unvulcanised Rubbers.
GRANULATED RUBBER	Different types with a variety of technical properties based on PV Rubber and unvulcanised Rubbers.

Remarks:

For more details and other products please see our detailed product data sheets.
Other PV - Latex can be produced upon customers special technical requirements.
